

## FM Fragrance Comparison List (updated November 2020)

Pure: This is FM's entry level range - the bottle may be basic but the scents are beautiful and at a fraction of the price of well-known brands. Contain 20% perfume oil.

Pure Royal: This range is more concentrated than the Pure range as it contains 30% perfume oils, which means a more potent, longer-lasting scent.

Luxury: This premium scent comes in a gorgeous golden atomiser. Contains 20% perfume oil.

Utique: The Utique range of fragrances is FM's most premium brand – super long lasting, luxurious fragrances in beautiful packaging, 20% perfume oil.
